

RADIUS

UX Issue Priority Ratings

User Testing Action Items - Phase 3 Prioritisation

1. Survey Scores Reference

Scores from CAB302_Radius_Survey_Findings.docx (25 participants, 18 May 2026):

Survey Question	Score / 5	Status
Registration and sign-in UI easy to navigate	4.43	Strong
Registration and sign-in process simple and intuitive	4.33	Strong
Aesthetic design choices appealing	4.38	Strong
Easily able to view crime hotspots and filter in hotspot view	3.52	Weak
Hotspot map UI easy to navigate	3.45	Weakest
Easily able to view existing reports and location on map	4.10	Moderate
Easily able to create and submit a report	4.10	Moderate
Report screen UI easy to navigate	3.86	Weak
Easily able to view and update profile details	3.93	Moderate

2. Issue Priority Ratings

Issue	Survey Area	Score /5	Priority	Status
DESIGN & UX				
Dark mode toggle visible but non-functional	Profile / all screens	3.93	Critical	DONE
Home location field shows raw lat/long - users don't understand it	Profile screen	3.93	Critical	DONE

Add colour identification for police reports marked as dealt with	Report screen (police)	3.86	High	DONE
Add AI summary of searched/filtered area on hotspot map	Hotspot map	3.45	Low	DONE
FILTERS				
Rename / visually improve filter buttons for clarity	Hotspot map / Report screen	3.45 / 3.86	Critical	DONE
Filter dropdown overflows window - needs constraining	Report screen	3.86	High	DONE
Add time range filter options (1hr, 24hr, 3 days, 7 days, all)	Hotspot map	3.52	High	DONE
Add filter by severity with grouping (high to low)	Hotspot map	3.52	High	DONE
Add date range filter to reports list	Report screen	3.86	Medium	DONE
Suburb search filter - dropdown autocomplete suggestions	Hotspot map	3.45	Low	DEFERRED
REPORTS				
Users cannot edit own reports after submission	Report screen	3.86	Critical	DONE
Reports default to a valid crime category - user must select one	Report screen	3.86	Critical	DONE
Users should not be able to submit a future date/time	Report screen	3.86	Critical	DONE
Bottom nav bar disappears in reports map view	Report screen	3.86	Critical	DONE
Address autocomplete pops up unexpectedly / wrong z-index	Report screen	3.86	High	DONE
Save/submit button disappears when clicking off and back on form	Report screen	3.86	High	DONE
After selecting autocomplete suggestion, dropdown reappears	Report screen	3.86	Medium	DONE
Show confirmation message/timestamp after submitting or actioning	Report screen	3.86	Medium	DONE
Category scroll bar doesn't reset when creating multiple reports	Report screen	3.86	Low	DONE

Add more granular police statuses (Under Review, Dispatched)	Report screen (police)	3.86	Medium	DEFERRED
Autocomplete dropdown only shows when address field is selected	Report screen	3.86	Medium	DEFERRED
Scroll bar in autocomplete for long result sets (e.g. Chermshire)	Report screen	3.86	Low	DEFERRED
Option to drop a location pin instead of typing address	Report screen	3.86	Low	DEFERRED
MAP & HOTSPOT				
Map not defaulting to user's current location on open	Hotspot map	3.45	Medium	DEFERRED
Clicking hotspot area should display the crimes that form it	Hotspot map	3.45	Low	DEFERRED
Map pins show generic 'crime' label - should show crime type	Hotspot map	3.45	Low	DEFERRED

3. Prioritisation Decisions

Addressed (Critical and High priority)

All Critical-rated issues were resolved before the Week 13 submission. These directly drove the weakest survey scores (hotspot map 3.45, report screen 3.86) and were raised by the highest number of independent testing groups. All High-priority issues were also resolved before submission.

Deferred (Medium and Low priority)

The following issues were rated, documented, and consciously deferred due to lower user impact, lower frequency of complaints, or implementation effort exceeding available sprint time:

- Suburb search filter autocomplete suggestions (Low - suburb search already functional; dropdown autocomplete is an enhancement with lower return relative to effort)
- More granular police workflow statuses - Under Review, Dispatched (Medium - raised by fewer groups, workflow complexity outweighed time available)
- Autocomplete dropdown only shows when address field is selected (Medium - partially resolved by other autocomplete fixes; full fix requires deeper refactor)
- Scroll bar in autocomplete for long result sets e.g. Chermshire (Low - edge case, low frequency across testing groups)
- Option to drop a location pin on the map (Low - requires new subsystem, high effort relative to frequency of request)
- Map not defaulting to user's current location (Medium - requires device location API and permission handling, effort exceeded sprint time)
- Clicking hotspot area to display constituent crimes (Low - significant map/JS bridge work required, deferred post-submission)
- Map pins showing crime type rather than generic label (Low - data model change across map rendering layer, deferred)

4. Outcome Summary

Total Issues Identified	Addressed	Deferred	Critical Issues Resolved
25	17	8	6 / 6 (100%)

All deferred items are documented above. All Critical-rated issues were resolved prior to Week 13 submission.
